PROFILE

Senior React Native Developer | JavaScript & TypeScript Expert | Full-Stack & Mobile Solutions

With 3+ years of hands-on experience in React Native, I specialize in building high-performance, cross-platform mobile applications tailored for scalability and real-world impact. Beyond mobile, I bring strong proficiency in React for web development and Node.js for robust backend systems. Whether it's integrating Firebase, crafting serverless APIs, or delivering complete end-to-end solutions, I ensure clean, efficient, and maintainable code across the stack.

WORK EXPERIENCE

ADMK Solution - (Islamabad pakistan)
React Native Developer

- Developed a global mobile application serving users in the UK, Pakistan, Canada, and the USA etc. ensuring high performance and localized experiences.
- Led full-cycle development, optimizing features, UX, and app performance for enhanced engagement.
- Successfully published the app, achieving increased user retention and business growth.

Below are the applications I collaborated on:

Expert.one services app:

- Developed a cross-platform mobile app for users in the UK, Pakistan, Canada, and USA, featuring secure payment integration and optimized UX.
- Enhanced engagement through interactive product tours and performance-driven feature development.
- Successfully launched the app, boosting customer adoption and achieving business goals.

MeetsUp:

- Introducing our Meet-Up App, your go-to platform for networking, socializing, and connecting with like-minded people.

PrayerBowlGame :

- Developed an app for PrayerBowlGame in which user can add name for praying , user can Support this System in which Donate for Supporting..

TourGuidsnavigatorAgent :

- Here This App for Tour Environment in which people come to visit and . add to name for Tour with friend . in Egypt.

Madrassa Takk:

- Developed a B2B app streamlining:
 - Teachers: Manage classes, timetables, and attendance.
 - Guardians: Track students/drivers in real-time, view timetables, and results.
 - Drivers: Ensure timely operations under admin supervision.
 - Students: Submit assignments, track tasks, and attendance.
- A comprehensive solution enhancing management and communication for all users.

SKILLS

React Native . React js .

JavaScript and Typescript .

App Publishing in playstore \$ app store .

DeskTopApplication Node js .

mongodb ,express.js Advanced javascript (DSA) .

Audio and Video calling (Streaming) . Redux .

Redux Thunk . App Testing (jest+Enzym) .

Google Map . Payment Method (Strip)

Language Conversion Tailwind CSS .

Firebase/Firestore . Github/gitbucket .

Responsive App .

Android /IOS/Mobile & Tablet Application .

Api Integration . Push Notification .

Animated UI . Gifted Chat . REST Api .

C++/ OOPs . Thermal Printer by PORT & IP Address

Twilio SDK React Native

NETTECH Ltd- (Islamabad pakistan)

Present

React Native Developer

- As a React & React Native Developer , I played a key role in NetTech .

Multi-Tenant Review & Feedback System

React | Node.js | MongoDB | REST APIs

Built a web-based platform where customers can submit service reviews (e.g., waiters, ambiance) and employees (waiters, cleaners, guards) can report issues to the owner. Admins can log in to view all customer reviews and employee feedback in a clean dashboard. Each business (tenant) has isolated data and access control.

Key Features:

- Role-based access: Customer, Employee, Admin
- Tenant-specific data isolation
- Customer reviews with ratings
- Employee issue reporting
- React frontend with Node.js backend

EasyFiler :

- Accounting & Bookkeeping
- Taxation & Compliance
- Business Registration
- Internal Audit & Stock Taking
- Serving UK, UAE, Pakistan, and Saudi Arabia, we ensure timely, quality, and affordable services, focusing on client satisfaction with expert solutions..

Point Of Sales :

- A POS system for hotels and restaurants simplifies operations and improves customer service. Supporting Takeaway, Dine-In, and Home Delivery, it offers features like order management, payment options, stock tracking, custom billing, and sales reports. This system ensures smooth operations and enhances customer satisfaction, making it essential for the hospitality industry.

BusyBee :

- Developed cross-platform logistics solution for inventory/shipment tracking
- Key features: warehouse transfers, global shipment tracking, delivery verification
- Built with React Native for optimal performance across iOS/Android

Nailstify App:

- A platform for nails in which user can add and purchase different kind of stuff . using javascript, Firebase.

Connect4 Life App :

- Premium dating app: Smart matching, intuitive design, authentic connections.

GoodsIn App:

- GoodsIn: Real-time inventory tracking & supply chain optimization.

Upwork >>

PashPerfume::

- Perfume e-commerce platform with customer reviews & ordering.
